ESR13: DEVELOPMENT OF NEW FINANCIAL MODELS FOR THE CIRCULAR (BIO)ECONOMY

Sergio is a Mexican PhD student at the University of Ghent at the department of Agricultural Economics and ELO.

Research goals and focus:

- The aim of ESR13 is to encompass survey design, application and analysis, followed by financial modelling.
- Exploration of needs and requirements across the stakeholder chain in order to define business models that will distribute a new fertiliser value in a sustainable manner.
- Close collaboration with most researchers involved in the project.

Expected results: Outputs from this research will serve as a base for decisions towards market accessibility, potential business cases and the distribution of social benefits of REFLOW products, as well as recommendations over financial configurations that will give certainty to potential investors and interested sectors.
